

# Freedom in magnetic measurement

Take this magnetometer anywhere!

Get easy 3-axis measurements – up to 20 T, with an accuracy of  $\pm 1\%$ . Almost reduced to its cable, the THM1176 is the world's most compact magnetometer. A revolutionary integrated sensor provides access to very small gaps.

Plug the USB connector either into your PC or into the optional PDA and start collecting your data. Display the results numerically or graphically. Modify the software as you want – the source code is provided. In a word: freedom in magnetic measurement.

## THM1176: the only handheld 3-axis Hall magnetometer
